Lakshadweep	UT	3	2	2	66.7	MoRTH Road Accidents in India 2023

How to read this report

Figures are reported police statistics, not live alerts or exact crash locations. Blank values indicate missing comparable State/UT casualty data, not zero. Deaths per 100 accidents are calculated from the selected reported figures; they are severity ratios, not population rates. State boundaries and reporting revisions can affect comparisons.

Source: State/UT accident totals (2015–2024) with official casualty detail (2017–2023). State/UT accident counts cover 2015–2024. State/UT killed/injured detail is bundled for 2017–2023; 2015–2016 and 2024 casualty detail is not available in the bundled file. Population-normalized rates are not yet included because a comparable official population denominator has not been imported. Sources: MoRTH Road Accidents in India 2023 and Lok Sabha Unstarred Question 57 (2023).
